

Site-to-Site: Multiple Office Collaboration

Remote work prevails nowadays. Companies demand an easy solution to link multiple office networks, and end users look for remote work environment on-the-go.

GoodCloud S2S (Site-to-Site) provides a simple SD-WAN (Software-Defined WAN) solution using routers with minimum investment while maintaining the same level of security, elasticity, and automation.

Simple routers connect your multiple offices to one LAN network.

Flint / GL-AX1800
For Home & Office
Wi-Fi 6 Coverage

500Mbps
